Exceptionally stable, reliable, long lifecycle platform

HP Compaq rp5700 Business Desktop PC

For demanding business environments that need a PC to withstand rigorous use, HP offers the exceptionally stable, highly-reliable HP rp5700 Business Desktop PC. The HP rp5700 is designed for customers who value reliability and longer transition times between platforms. A five-year lifecycle with great security and manageability features can mean less time spent on your IT and more on your business. With HP and their network of strategic relationships, you get the high-quality products, support and services that more customers trust.

Exceptional stability

The HP rp5700 has a five-year lifecycle with no changes to fit, form or function on many components. This means fewer product transitions and less hardware and software configurations to support, which helps minimize disruption to your business operation. When change is needed, HP has many programs and tools, such as Product Change Notification, to ease integration.

Built to last

A hardened design provides a consistently reliable, high-quality product.
Oversized cooling means the unit is built to operate in an ambient 40°C environment; Gold-plated connectors provide longer wear and resistance to corrosion; Higher endurance temperature rated capacitors help resist heat and last longer; Poly-fused power ports that automatically reset help protect the system board from power surges or accidental hot-plugging; A high-wattage auto-sensing power supply with surge-tolerant protection can withstand power surges up to 2000V protecting both equipment and data.

For your unique business requirements

Address your unique business requirements with the features and services you need to maximize your technology investment. Flexibility of choice provides a selection of features like connectivity, processors, operating systems, RAID, and dual monitors. Help protect your business privacy and your hardware assets by selecting the most optimum security to protect your critical resources.
